

LEGALEASE — PROPOSED SOLUTION

OVERVIEW:

LegalEase is a two-layer application:

1. FastAPI backend that handles AI generation and document formatting
2. Streamlit frontend that provides a clean user interface

USER FLOW:

1. User opens `http://localhost:8501` in browser
2. Fills form: Document Type, Parties, Terms, Effective Date
3. Clicks "Generate Document"
4. Streamlit sends request to FastAPI at `localhost:8000/generate`
5. FastAPI calls GeminiDocumentGenerator which prompts Gemini
6. Gemini returns formatted legal text
7. FastAPI returns JSON to Streamlit
8. Streamlit displays:
 - Dark-themed preview box
 - "Click to Edit Document" button
 - Download buttons for .txt, .docx, .pdf

KEY FEATURES:

- Editable preview
- Multi-format export
- Professional legal structure
- Formatted DOCX with Times New Roman
- Branded PDF with header/footer

ARCHITECTURE DIAGRAM (conceptual):

[Streamlit UI] ↔ [FastAPI Backend] ↔ [Gemini API]
