

LEGALEASE — TEAM INVOLVEMENT IN DEMONSTRATION

=====

TEAM COMPOSITION

Total Members: 5

1. Arul Raj — Team Lead & Full Stack Developer
2. Santhosh R — AI Integration Specialist
3. MUKESH RAM K — Backend & API Developer
4. Karthikeya V M — UI/UX Designer
5. Vishnu Prakash — QA Engineer & Documentation Lead

TEAM ROLES & RESPONSIBILITIES

1. ARUL RAJ — Team Lead & Full Stack Developer
 - Initiated and architected the LegalEase project
 - Built the complete FastAPI backend structure (legalEaseAPI/)
 - Integrated the AI core module (ai_core/gemini_generator.py)
 - Managed GitHub repository and coordinated code pushes
 - Wrote all 8 phase documentation PDFs
 - Recorded the final project demo video
 - Submitted the Google Form with all required details

- Time split: 40% development, 30% coordination, 20% documentation, 10% testing

2. SANTHOSH R — AI Integration Specialist

- Selected the Google Gemini model (gemini-3.8-flash) after testing multiple options
- Designed the prompt engineering strategy for legal document generation
- Fine-tuned prompts to produce structured documents with numbered sections
- Tested AI output quality across document types (NDA, Contract, Lease)
- Documented AI behavior and edge cases (rate limits, JSON formatting)
- Time split: 60% AI work, 25% testing, 15% documentation

3. MUKESH RAM K — Backend & API Developer

- Built the routes.py file with the /generate POST endpoint
- Designed the Pydantic DocumentRequest validation model
- Configured main.py to initialize FastAPI and mount routes
- Handled error responses and HTTP status codes
- Optimized API request/response cycle
- Time split: 70% backend development, 20% testing, 10% documentation

4. KARTHIKEYA V M — UI/UX Designer

- Designed the complete Streamlit interface (frontend/app.py)
- Created the dark-themed preview box with proper typography
- Structured the four input fields (Document Type, Parties, Terms, Date)
- Designed the "Click to Edit Document" and download buttons layout

- Chose the color scheme (dark preview, blue accents) and overall aesthetic
- Time split: 70% UI/UX design, 20% usability testing, 10% documentation

5. VISHNU PRAKASH — QA Engineer & Documentation Lead

- Ran all 9 performance test cases (NDA, Contract, Lease, TXT, DOCX, PDF, Edit, Errors, Rate Limits)
- Wrote the Performance Testing Report
- Reviewed all 8 phase documentation PDFs for accuracy
- Verified the final application against the original project requirements
- Handled final proofreading and packaging
- Time split: 50% testing, 35% documentation review, 15% coordination
